Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 107,108,111,112,115 and 116 are rejected under 35 U.S.C. 103(a) as being unpatentable over Johnson in view of Kemp.

In Johnson, see header, jambs and sill 12, insert tracks 102, and screen tracks 112,114, spring biased roller assembly 30, fabric module 34, fabric 36, inserts 16,18 and screen-end member 40. What is not shown is the screen end member actually being located in a screen track. However, such is well known, as illustrated by Kemp at 30 (track) and 138(crossbar), page 3, right column, lines 64-70. It would have been obvious to provide Johnson with such a crossbar and track to provide close tolerances between the crossbar and track and to fully support the leading edge of the screen.

Claims 109,110,113,114 and 117 are rejected under 35 U.S.C. 103(a) as being unpatentable over Johnson in view of Kemp as applied above and further in view of Ralph et al.

Ralph et al discloses that it is old to provide counterbalances, 60-63, and latches 100 on sliding sashes in a door. It would have been obvious to modify Johnson to have these features so as to improve operation and hold the sash in position.

Double Patenting

Claims 107,109-111,113-115 and 117 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 14,15 and 17 of U.S. Patent No. 6,618,998. Although the conflicting claims are not identical, they are not patentably distinct from each other because the differences between the claims are considered to be obvious.

Claims 108,112 and 116 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 14,15 and 17 of U.S. Patent No. 6,618,998 in view of Johnson. The use of a spring to retract a roller screen is taught by Johnson and it would have been obvious to apply such a feature to the cited claims of '998.

Response to Arguments

Applicant's arguments have been fully considered but they are not persuasive. Applicant's remarks address the lack of teaching in Johnson of the screen end member extending into the screen tracks. While the Examiner agrees with this assessment of Johnson, other art, of which Kemp is used as an example (see also German 19639478), clearly teaches a track and screen end member that rides in the track. Such a teaching is clearly analogous to Johnson and it's combination therewith is justifiable.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
